				53	29	30	114

Definition: Boat Length and Beam. The boat size measurement will be defined as the overall physical maximum length and width from tip to tip above and below the waterline. These measurements shall include, but are not limited to, physical hull attachments by the Manufacturer or the Owner such as Pulpits, Rudders, Propulsion Motors, and Ladders.

Amended: Revision 1, May 22, 2010 by a two thirds vote of the Membership as prescribed in Article VIII of the Sunapee Harbor West Club Bylaws.
